

# What has been happening in Year Six

This term we have been investigating micro organisms in science with an in depth look at how mould grows on our food - YUCK!

In English we have been exploring the world of August Pullman through the novel 'Wonder' by R.J. Palacio. This has opened students' eyes to a variety of different struggles that people can face.

We have been navigating perimeter, area and volume by getting hands on with measurements of our new playground. We were lucky enough to be able to be taken into the construction site to do some measurements with the builders.

Last week we held our in-school arcade and welcomed students from years 3, 4 and 5 to come and try the arcades we built in term 1. Later on this week Year 6 Parents are invited to try out our games as well.
